

It's No Secret That You Are Miraculous **By Bill Gluth, Conscious Living Trainer, Reiki AZ.com**

Energy – Matter – Consciousness are the unifying principals of all life and the answer to life's greatest mystery – who are we as human beings.

We are the only conscious form on Earth who can manipulate energy and matter with our thoughts or consciousness. Because of this ability, nature holds all of humanity in awe.

Dare to think thoughts that were only dreams until today. You are the creator of life. You control all events and outcomes.

With your ability to listen and respond to your consciousness' direction you can be either limited humanity or an unlimited expression of life that we often shorthand by calling it God.

This is the secret the most successful and passionate people on the planet today know that you may not.

But knowing and living this grand truth is quite another thing.

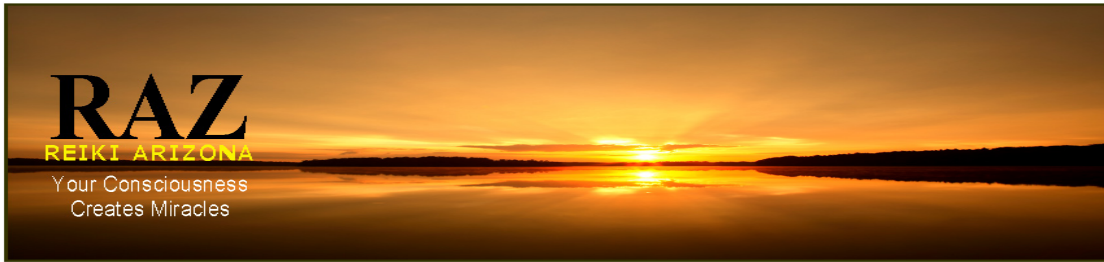

As a human being we have an inherent nature to want to learn and grow. This stems from our innate desire to create.

For some, that learning has to do with life in a physical form. For others, their inner-self or soul wants answers to the full mystery that is called life in a physical form.

When you are tired of the "normal" life and want to know more, you start looking for answers. This is a mental space where you can consider a new point of view. For some it will be a point of view you've considered before but have yet to manifest. For others, it will be new information that will amaze and enlighten.

After all, enlightenment means "Lightness of being." When you consider these creative ideas, you'll find yourself feeling lighter and that is my goal. Because when you feel light enough you will move beyond gross matter and into a feeling of peace and contentment that perhaps you have never known.

Finding the Miracle that you are inside is an easy thing to do. The hard part is deciding to look. Then taking action to live that truth every day.

That's why you're seeking new ideas today.

You are seeking answers, but I have none to give you.

All I can do is inspire you to realize the brilliance that you already are.

I can show you a path, from experiences I have learned by doing, but you have to walk that path to make it your own.

You can learn how to control energy and matter with your thoughts and consciousness easily. The hard part is using it every day.

All of this leads up to changing your life, so that you can create a value that extends and enhances the life of someone else.

This is practical spirituality, learning to live as the Everyday Miracle you are already.

All you have to do is want that deep level of peace in your heart, more than you want the turmoil that may be your life right now.

Our first step is to learn the unifying principal of life – which is we all control energy and matter with our consciousness. That is all life is and has ever been.

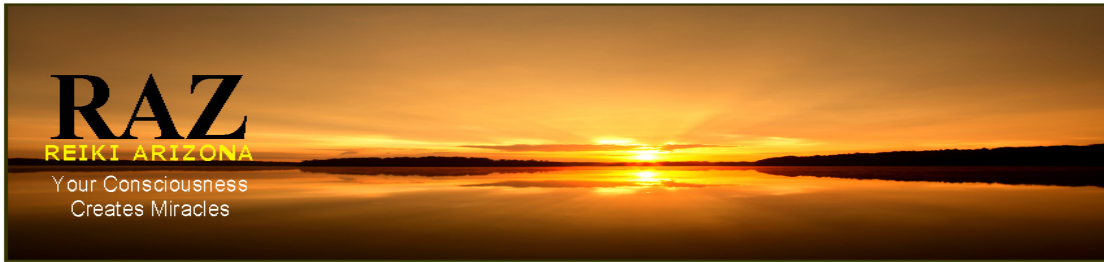

Take the first step now. Learn what consciousness is and why you are a miracle waiting to unfold, no matter how you are expressing your life today.

If you are just beginning your exploration of the Universe, Reiki Training is an excellent choice. Learn about Reiki Training at http://www.reikiaz.com/reiki_training.htm

If you've experienced energy, have begun to explore your consciousness, and are looking for the answer that unifies it all, Theta Healing classes will expand your awareness and open you to new potentials. Learn About Theta Healing Classes by going to <http://www.energyhealingtraining.com>

No matter what you choose, realize now and forever, you are unfolding consciousness looking for the path that takes you back home.

And home is a heart that realizes you already are every miracle you will ever seek.
